

PROJECT SPOTLIGHT

Commercial Office at 35 Clarence

Industry : **Commercial Office**

Location : **35 Clarence St, Sydney, NSW**

Stakeholders:

Architect : Bokor Architecture

Engineer : Norman Disney & Young (NDY)

Electrical Contractor: Rotric/Peloton

Builder: Case Meallin

BACKGROUND

Started with Bokor's concept design for 35 Clarence Street, Sydney, to renovate and upgrade the existing basement, lobby, and eight floors, Bokor was clear on what they wanted to achieve: a fresh look and intricate state-of-the-art for modern architecture. By that, mLight aspired to produce custom linear lighting to give a seamless curve-path design to lit the lobby and hallway of 35 Clarence Street. Our challenge for this project was to meet the expectation of the lighting design, overcome the mitre-join complexities, and prepare the job so that on-site installation is effortless

OUR SOLUTION

Authentically calls for uniqueness and creativity, Mlight Swerve76 is the answer. The Swerve76 offers a chance to push the limit of how light fittings can be designed and performed; light as you imagined. Combined with the delicate mitre joins and our mConnect™ joining system, the Swerve successfully illuminate the lobby and hallway as a focal point, an art piece above the modern minimalist interior at its best.
